

IOANNIS IOANNOY

PERSONAL PROFILE

I am currently working as a Lead Front-End / Back-End (Full stack) ASP.NET Developer at UiBS, Limassol. My role involves architectural changes to the Business/Data Access layers (BLL/DAL) for improving the company's software and introducing new functionality as well as extending the possibilities of the software (CMS, CRS, CRM). In short, some of the technologies I use include ASP.NET, VB.NET, AJAX, jQuery, HTML, HTML5, CSS, CSS3, C#, IIS, SQL Server, Store procedure and Telerik controls toolkit. In the past, I have worked with Drupal, PHP, SCSS, MySQL, Linux and some C#. I enjoy learning more and new technologies about web development in general.

OTHER

- Learning Cross Platform Mobile development (Apache Cordova, HTML5/CSS3/JavaScript)
 - My online portfolio is www.iioannou.com
-

MSC FINAL PROJECT

MYFEEDBACK PORTAL – (Distinction mark)

The technologies involved included ASP.NET, VB.NET, SQL Server, HTML, CSS and AJAX. The system has two main stakeholders, students and academics; academics for giving feedback and students for receiving the feedback. Staff members are also required for the initial setup. It is a web based solution and provides features such as calculation of overall module grades, statistical analysis of modules using charting controls, the ability to listen to the feedback in speech form, particularly for students with sight disabilities. The system also creates an organized file structure for submissions.
